Package Contents

- Part # TSU-055 - Universal Umbrella
- Part # 0550 - Carrying Case
- Part # 0551 - Umbrella Bracket with Pin

1. Position screw bit end of the bracket about two feet above your head and screw into tree. Pre-drilling a hole with a 3/8 inch drill bit will speed up this process. For bowhunters, it is recommended to position the bracket higher for clearance of your bow.
2. When the bracket is fully seated into the tree so no threads are exposed, align the umbrella post of the bracket so that it faces directly upward.
3. Fully open the umbrella and insert the base of its shaft onto the bracket post and make sure the straps of the umbrella faces the tree. Secure it by inserting the retainer pin through the hole in the post and continuing through the hole in the umbrella shaft and out the other side.
4. Stabilize the umbrella to the tree using the nylon straps. Tie them together around the backside of the tree.

Please inspect the shipping carton for damage or evidence that it may have been opened before you received it. Then inspect your umbrella carefully. Compare it to the picture on the product label and the picture illustration in your instructions. If for any reason you are not satisfied with the product, do not use it until the problem is corrected.
